

Sophomore Forecasting

- If you have not taken Physics yet, you must take it as a sophomore. If you have taken it, you may take Chemistry as a sophomore.
- If you took World Geography as a freshman, you only take one semester of Global Studies as a sophomore. Your World Geography course fulfills half of the 1-year Global Studies requirement.
- It is recommended that you take Speech in sophomore year, but it is not required in sophomore year. It is a graduation requirement though, so if you do not take it as a sophomore, you will need to take it as a junior or senior.
- Have you taken any PE or Health credits yet? It is strongly recommended that you complete at least one course in each by the end of your sophomore year since you need two courses in each to graduate. All students need to complete Health 1 by the end of sophomore year, so if you have not taken it yet, you need to forecast for it. Think about the Health 2 summer course as an option as well.
- For most of you, this is your first chance to take an Honors class. If you qualify for Honors classes, choose carefully which one(s) you forecast for and think about your workload balance.
- Remember, the more required courses you take now, the less you have to take as a junior or senior, which frees up more time for electives later.
